THE PROPER CARE OF YOUR AUTOMOBILE

Sport Model Tops

WHILE they are made of a different material and are not coated with a varnish, as are the tops of closed cars, a certain amount of inspection and care is necessary to the upkeep of the sport model top. This style of top is made from a gray, tan or khaki coloured fabric called teal or Burbank cloth. It usually consists of two layers of closely woven cloth which are fastened together with rubber cement. When this material is new it will resist weather.

After the car has been in service for a year or two, however, the top material sometimes loses

its waterproof qualities and leaks develop.

When this occurs it is useless to try to waterproof the material with a coating of varnish, lacquer or any other kind of surface finish. They are not suited to material of this type, and are liable to cause it to stiffen, crack, or become discolored. The proper compound to use on sports model tops to renew their waterproof qualities is one which will sink into the cloth and waterproof the fibres without changing the color or appearance of the material in any way.

Next: "Care of Fenders."

HOW TO LISTEN ON THE RADIO.

"It is necessary that the listener contribute his part to the broadcast," says Mr. Filson Young in Radio Times. "Mere receptiveness is not enough. 'To sit like an empty bucket and be pumped into,' said Carlyle, 'cannot be exhilarating to any person.' And broadcasting in which all the effort is one side cannot be nearly as effective as the broadcasting which is a partnership of effort between speaker and listener. In other words, there cannot be good broadcasting without good listening. And what is good listening? A mental attitude, of course, on the part of the listener. You must be receptive and if possible sympathetic to the person who is broadcasting. You must realize that he is groping out into space in the hope of meeting your very self; that he is radiating his own personality for the purpose of encountering yours. So you must send something out too. You must also, if you are a good listener, make trouble with your mind. The lazy listener is the kind who refuses to stir his mind until it is stirred by the words of the speaker. This applies equally to music, and in a very special sense, to listening to radio drama. The first thing that is required is concentration, and the second contribution—contribution of one's attention to the subject itself, as well as to what is being said or uttered about it."

ROBERT C. JOHNSON IS THE TORY CANDIDATE

The Conservatives of the Stony Plain Provincial Constituency met in the town hall on the evening of the 8th, with about 100 present when the proceedings got going.

President McCulla was in the chair, and delegates were present from Derwent, Wabamun, Fallis, Seba, Duffield, Carvel, Spruce Grove, Golden Spike, Winterburn and Woodbend.

J W McCulla was re-elected president and G Oppert-hauser re-elected secretary, with Jas Brox as vice-president; and the chairman of each poll was placed on the Executive.

Following this, nominations were called for, for a candidate to be placed in Stony Plain Constituency at the next Provincial election.

J W McCulla was put up as a nominee; as also was Geo Oppert-hauser; but in each case the honor was respectfully declined, in short speeches to that effect. The name of R C Johnson was then offered by two delegates from the eastern section of the Constituency. In a few well-chosen remarks Mr Johnson accepted the nomination, and on a motion the choice was made unanimously.

Short addresses were made by D M Duggan, M L A, leader of the Conservatives in Alberta; Col F C Jamieson, M L A for Edmonton; and J A Buchanan, Edmonton organizer.

Mr Johnson, the choice of the Convention, is a farmer in Winterburn district, being located about three miles south of Winterburn store. He is at present, and has been for several years a Councillor of Spruce Grove Municipality, representing Division One on that board.

Hockeyists Waiting for Ice.

A business meeting of members of the S. P. Juvenile Hockey Club was held the other evening in the office of Mr Sulby Grant, with President W. Foster in the chair.

A discussion took place on the advisability of holding some sort of public entertainment for the purpose of augmenting the present funds on hand. A public dance was suggested, but this did not seem to meet with the approval of the majority present. A motion made, that the entertainment take the form of a whist drive, was carried. For this purpose a committee consisting of Messrs H Pailer, A Wudel and Pat Gannon, was appointed.

The question of providing uniforms for the players was under consideration, but action on this was deferred.

A report from the finance committee showed a satisfactory amount to the credit of the organization, due to the hearty response of the townspeople when the campaign was on.

It is believed now that, with the continued absence from the active hockey arena of the former invincible Junior hockeyists, a new field is opened to the present-day Juvies. With the proper support given them it is more than probable that the youngsters will shortly fill the place formerly held by Juniors.

"Fresh from the Gardens"

The Better Way

A news item containing only a few lines appeared recently in one of Western Canada's daily papers. It was not featured in big type nor with display headings as are murders, accidents, strikes, meeting of protest over relief quotas, etc., but it nevertheless recorded an event of real importance to the community concerned which might well be accepted and acted upon by other communities all over the country.

In order to provide a measure of relief assistance to people in need of it, the local authorities decided that, instead of continuing with a policy of giving direct relief to the exclusion of any and all other forms of assistance, they would provide a measure of work, and the news item to which reference is now made recorded the results, which, briefly, were:

One hundred miles of rural telephone lines badly in need of repair were re-constructed, the old poles cut off and re-set, ten rural systems were reduced to seven, the old wire and insulators thus saved were utilized to repair the lines on the seven systems, between 30 and 40 residents of the community were each given fifteen days work, and the only cash outlay for new materials was \$4.

Several highly important things were thus accomplished. First and foremost these men instead of being placed deeper in debt, as they would have been if merely handed direct relief, were given remunerative work which enabled them to discharge some of their past indebtedness. Secondly, the rural telephone systems which serve their own community were re-established for the benefit of the people there, and these systems likewise were again placed in a position as feeders to the long distance Government system. Thirdly, all the money expended, except \$4.25, went to the people of the district who most badly needed it, and no additional capital debt was placed on the rural telephone company, while the reduction of ten systems to seven should make for efficiency and less cost in operation.

It would appear to be gain to the people all round—in work provided, in past debts or taxes reduced, in restored and improved telephone service for the community and the probability of larger future revenues to the Government long distance system. It was worthwhile, constructive work without the imposition of any additional burden of debt.

Attention is called to this incident for one reason, and one reason only, and that is, to suggest to readers of this column, and in particular to those occupying some position of authority in their particular community, that they take a look around their own districts and see if there is not some kind of useful community work in which their own people in need of assistance could be employed to their benefit and to the benefit of the community as a whole.

There are other rural telephone lines in Western Canada badly in need of repair and rehabilitation; there are local roads that call for improvement; there are school buildings that require attention and repairs; there are other things, large and small, that have been neglected because of lack of funds. Why not make a survey of the community, and then organize the people to attend to all such matters, giving those in need of assistance an opportunity to work off burdensome arrears of taxes or earn a few dollars, instead of relying solely upon the distribution of direct relief.

By the one method municipalities are placed in a stronger position financially because their tax arrears are reduced; by the other both municipalities and its residents are placed deeper in debt. Furthermore, by the one method the community as a whole is bettered and improved and its services and institutions efficiently maintained, and the morale of its people strengthened; by the other neither the municipality nor its residents have anything to show for their added liabilities but the fact that they maintained their existence, leaving to the future the ultimate discharge of those liabilities.

What one community has done for its own advancement and the welfare of its people, many other communities can do, if they will. It requires thought, study, planning and organization, and a will to work. Meeting the absolute necessities of people through the distribution of direct relief is, no doubt, an easier way—for the time being. But sooner or later the burden must be carried, and paid off, and the longer the grappling with it is deferred the larger, heavier, and more difficult the burden becomes. Why not tackle it now in a forward-looking, constructive way?

One method, it may be said in conclusion, inspires new hope and confidence, with one good example encouraging another, whereas the other method tends to deeper discouragement and a further loss of that self-reliance and determination to provide self-help which is essential to the maintenance and further progress of any people and of all communities.

"WHY RISK FAILURE WITH DOUBTFUL BAKING POWDER."

LESS THAN 1/2 WORTH OF MAGIC MAKES A FINE BIG CAKE. AND YOU ARE SURE OF SUCCESSFUL RESULTS."

says MRS. CLARRY HUNT, Chief Dietitian for Gillett Products, Toronto

MAGIC costs so little! Just think—it actually makes less than 10 worth of Magic to make a delicious layer cake. Why take chances with doubtful baking powder? Bake with Magic and be sure!

MAGIC
MADE IN CANADA

Excavators Make Discovery At Base Of Mountain In Valencia

An entire prehistoric Teban city has been discovered at the base of the mountain of San Miguel in Valencia, the Excavation Commission there announces. Further discoveries are expected. Among the remains, to which great value is attached, are ancient vessels, on one of which are paintings of soldiers on foot and on horseback. A complete Iberian alphabet has also been found.

KRUSCHEN Strikes at the Usual Cause of FAT

Try Kruschen at Our Expense

If excess, unhealthy fat is bothering you, take advantage of this offer to try Kruschen at positively no expense. Your druggist has a limited number of the Kruschen "Gut Packages" now in stock. This is the Regular bottle together with a separate TRIAL bottle.

Use the TRIAL bottle first. Kruschen eliminates waste and poisons from system—daily, if you follow the instructions. It strikes not only at the usual cause of fat but at the root of half the human ills—internal sluggishness. If you have no excess fat, you will not cause you to lose weight. Kruschen costs only a few cents a week to use—and it makes you feel like a million dollars. Get your Kruschen Gut Package today. If you are not entirely convinced after using the Free TRIAL Bottle, your druggist will cheerfully refund your money when you return the Regular package unopened.

The old English pound was originally the weight of 7,680 grains of wheat "taken from the middle of the ear and well dried."

Dr. Wernet's Powder For FALSE TEETH

A Joy To All Users Can't Slip or Slide

Sprinkle on Dr. Wernet's Powder and you won't have to think about your false teeth all day long. Joyous comfort is yours. Easy anything you wear—It holds plates firmly in place—they positively can't slip or slide. Forms protective cushion for sensitive gums. Leaves no color, gummy substance—keeps mouth sanitary, breath pleasant. Prescribed by world's most noted dentists. The cost is small—the comfort great. Any druggist.

An aeroplane would have to travel 750 miles an hour to keep up with sound.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

—No Calomel needed

When you feel bloated, depressed, sour on the tongue, that is a sure sign that your liver is not doing its job. The digestion and elimination are being slowed down. Food is accumulating and decaying. Laid up and making you feel worse. More bowel-movements are made, but no relief, laxative candy or chewing gum, or sugar, don't get far beyond the stomach. You need a liver stimulant. Carter's Liver Bile is the best one. See bottle. Purely vegetable. Pure. Ask for them by name. No harm possible. See at all druggists.

The inventor of a salt cellar that will always have salt in it will supply a long-felt want.

Empire Air Routes

Sir Philip Sassoon Says Flying Time Must Be Speeded Up

Flying times on the long-distance Empire air routes must be progressively and drastically reduced, declared Sir Philip Sassoon, British under-secretary for air, on his return from a tour as far as Singapore, longest air tour ever undertaken by a government official.

The air ministry, the post office and Imperial Airways had reached the conclusion schedules must be speeded up, said Sir Philip. Measures particularly must be taken for development of the air mail service, he added, with extension of night flying. Sir Philip, an aviation enthusiast, said he had often landed at night-time and he considered commercial night-flying was a practical proposition.

Work Among Treaty Indians

Canada Has Faithfully Fulfilled Trust In This Respect

Canada has been faithful to her trust regarding the 112,000 treaty Indians in the country according to Herbert N. Awrey, Department of Indian Affairs, who addressed the Rotary Club in Ottawa.

Mr. Awrey, who is known to the Indians of Northern Ontario as "Shunla Ogema," or "Big Money Man," described his adventures as an Indian Commissioner deputized to pay the Indians the money guaranteed to them by treaty with the government.

Pointing out that eleven treaties had been signed with the Indians since Confederation, Mr. Awrey remarked that in 1933, \$4,088,000 had been expended on them plus \$850,000 interest from funds held in trust for them by the Dominion and \$234,000 in annuities.

Tracts of land had been wisely set aside at the outset for the Indians where they could live in communities and now there were 2,200 of these reserves in Canada. Money from land or timber sold was held in trust by Canada and the fund now totalled \$13,800,000. Interest from this amount goes to the Indians. Provision for education is also generous.

R. J. C. Stoad thanked the speaker and expressed the view that other government employees should outline the work they carry out with such integrity and regard for the public interest.

Girl Proved Innocent

Truth Stranger Than Fiction In Chinese Murder Story

Stranger than fiction is the story concerning the release from prison of a 20-year-old Chinese girl in Tsinanfu who was serving sentences on the charge of murdering her brother-in-law. She was released after four years imprisonment and was asked to re-enact the crime as she had been accused of poisoning her relative, with soup. She did, and it was noticed that several drops of what seemed water dropped into one bowl when the steam reached the ceiling. Investigation revealed a large, venomous snake occupying a swallow's nest, and that venom dripped from its jaws into the soup when the hot steam reached his hiding place. The girl is once more free.

Eel Damages Microphone

An electric eel, making its first radio appearance, knocked the microphone out of commission with dynamic personality. The radio staff in the course of a broadcast from the St. Louis zoo, sought to demonstrate the peculiar weapon of the eel that emits electricity. One announcer dangled his fingers in the aquarium and joined hands with a second, who touched the microphone. The eel turned loose its voltage and the microphone went dead.

Thirty per cent. more grain has been shipped from Vancouver this season than last.

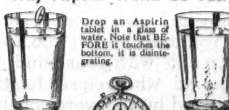

Here's Way Science Now Relieves Pain in Minutes

BAD HEADACHES, NEURITIS AND RHEUMATIC PAINS EASED ALMOST AT ONCE

Remember the pictures below when you want fast relief from pain. Aspirin cases even a bad headache disappears in a few minutes! An Aspirin tablet begins "taking hold" of your pain practically as soon as you swallow it. And Aspirin is safe. For Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN, the method doctors prescribe. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Get tin of 12 tablets or economical bottle of 24 or 100 tablets.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH

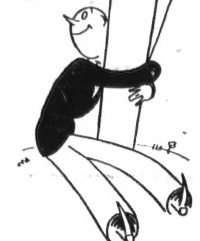

An Aspirin tablet starts to disintegrate and go to work.

What happens in these 2 seconds happens in your stomach—Aspirin tablets start "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures

ASPIRIN IS THE TRADE MARK OF THE BAYER COMPANY, LIMITED

It's the Old

Rolled Story

Ogden's Fine Cut Cigarette Tobacco and "Chancteler" or "Vogue" papers—that's a story that every man who "rolls his own" is certain to enjoy.

There's pleasure to spare in every chapter of it—the downright pleasure of easier rolling and cooler, more fragrant smoking that Ogden's Fine Cut always gives.

Just let Ogden tell YOU the old rolled story. A cigarette rolled with Ogden's Fine Cut and "Chancteler" or "Vogue" papers will tell you volumes about smoking satisfaction—in the language you like best.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

P.S.—At any POKER HAND Premium Store or by mail, you can get 4 large bottles of "Vogue" or "Chancteler" cigarette papers for one complete set of POKER HANDS.

Oldest Firm In World

Stora Kopparbergs Bergslags Aktiebolag, of Stockholm, Sweden, which has been founded to be the oldest trading concern in the world is still actively in business and keeping up with the changing world. It has been operating since the twelfth century and has documents over 700 years old.

Shakespeare used 24,000 words in his complete works, a remarkable vocabulary in his day.

Approval Of Public Health Measures Under Federal Control Is Expressed By All Provinces

Seeking concerted action by the federal and provincial governments in matters of public health, Dr. Gordon Bates, general director of the Canadian Social Hygiene Council, made known the canvassed opinions of provincial authorities with a view to co-ordinated measures under Dominion authority, arrived at through a federal-provincial conference.

Dr. Bates declared that in the British North America Act the only reference to health was in subjects dealing with quarantine and establishment and maintenance of marine hospitals. Because of this, he believed there was "no good reason why the Dominion should not enter into full participation in any scheme for the promotion of health throughout Canada."

From each of the nine provinces came expressions of approval of co-operation along health lines.

Hon. G. M. W. Watson, provincial secretary for British Columbia, said his province "is anxious to co-operate with the federal authorities in the promotion of public health which we regard as the very cornerstone of national well-being," and declared "from the standpoint of scientific public health, provincial boundary lines have little significance."

From Alberta came pronouncement of Hon. George Hoadley, minister of health, that "there can be no question in regard to the desirability of representatives of the various provincial governments and the federal government meeting for the purpose of giving consideration to the many health problems confronting us, both provincially and nationally; the question of health is one which is vital not only to each of the provinces but to our country as a whole."

Hon. J. M. Ulrich, minister of public health for Saskatchewan, stated "there appears to be a definite place for the Dominion department of health in connection with the co-ordination of provincial activities, especially those relating to inter-provincial matters."

Premier John Bracken of Manitoba stated inter-governmental discussion of national health was "very desirable," although his government was not disposed to make any presentation public before the proposed conference.

Milk In The School Lunch

Should Be Included In Some Form Every Day

If a child must carry his or her lunch to school it should be carefully planned for, after all, it is one of the three meals of the day and should, therefore, provide its share of food requirements. Milk should be included in some form in every child's lunch to avoid a daily shortage of the food so necessary for the growing girl and boy. The milk may be carried in a screw-top jar or thermos bottle, or it may be more convenient to have a supply of milk delivered each day to the school. When making a milk pudding for the members of the family who are at home for the noonday meal, it is an easy matter to set a serving aside in a small glass jar for the next day's school lunch box. Wherever possible, particularly during the winter months, arrangements should be made to provide one hot dish at school to supplement the cold foods brought from home. Many milk dishes such as cream soups, cocoa, cream vegetables, cereals, eggs or meat are easily prepared, cost little, and will add materially to the nourishment and satisfaction derived from the school lunch.

The famous physician Hippocrates observed that when symptoms of lockjaw develop ten days or more following a wound a patient is more likely to recover than if lockjaw sets in promptly.

A man who had taken a girl out to dinner when she was 18 met her when she was 40 and she looked as though she'd been out to dinner ever since.

A Welsh Klondike

London Syndicate Hopes To Re-Open Old Gold Mines

Traces of open casts, querns and stones for crushing quartz discovered in Welsh gold mines prove them to have been worked by the Romans. Seven of these ancient gold-mines, tucked away in the folds of the Merioneth Mountains are to be reopened by a London syndicate, who hope, by utilizing modern machinery and engaging expert gold miners to establish a Welsh Klondike. In their palmyest days, a few years before the war, Welsh mines yielded \$1,000 worth of pure gold weekly; the wedding rings of the Queen and the Princess Royal are made of Merioneth gold. Ore extracted from the Prince Edward Mine, near Dolgelly has on occasion assayed out at eight pennyweights of gold per ton which ranks it in richness of yield with the gold-bearing quartz of the Rand.

By Ellen Worth

SO ENTIRELY WEARABLE, SMART!

Slenderizing is this simple to make dress patterned for to-day. Very graceful and lovely is this slenderizing model and a dress that suits all day needs most admirably. It is bottle green canton crepe. The cascading jabot frill that is part of the collar adds an exceedingly attractive touch. The stitching on the sleeves is smart. The pattern provides perforations for same. It can be omitted, however, if you please. Another fascinating scheme is black crepe with white crepe collar and jabot.

Metal threaded woolen, velveteen, wool crepe, rayon novelties, etc., would also be charming for this easily made dress.

Style No. 630 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 36-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

HANDWRITING REVEALS SECRETS OF CHARACTER

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

Editor's Note: A great deal of comment has been aroused by these articles on Character from Handwriting. Hundreds of readers write in and ask for a personal analysis of their own writing, and the author will analyze yours. See the announcement at the foot of this article.)

To the hundreds of readers who have written to express their appreciation for personal character analyses and to comment on the often uncanny accuracy of the delineations, I would like to take this opportunity of thanking them.

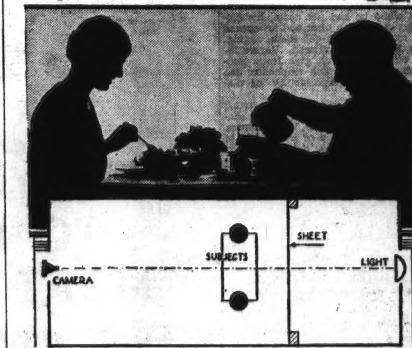

And, at the same time, to add a word of advice. The utmost value from a character analysis is only obtained by those who act on the advice suggested in their analysis. It is one thing to learn of your weak points, and to be shown wherein lies your strongest characteristics. But it is quite another thing to act on them! And that is where the real personal value of Grapho-Analysis comes in.

I have a letter this week from a young lady who, for personal reasons, does not wish me to send her a letter direct. She asks that I reply in this column. And, because the subject is one that will interest a great many readers, I am very glad to do so.

Miss J., Winnipeg, writes: I am very much in love with a man who is married. My parents know that I go about with this man, and are very much against it, and it is causing a great deal of trouble in my home. I am 20 years of age, and this is a really serious love affair that I have had, but it means everything to me. The man I love says that he is not happy with his wife and talks about getting a divorce. But, he says, this is not possible at the present time. I do not want to give him up, but I would like your advice, as it may help me to do the right thing.

Dear Miss J.—You send me your own writing, and that of the man with whom you are in love, but you do not send me any from his wife.

The SNAPSHOT GUILD SILHOUETTES

An arched doorway between living and dining rooms, a last sheet and a bright light—these were the only special requirements for this silhouette. The diagram shows the relative positions of camera, subjects, sheet and light.

With the advent of cooler weather, some snapshoters assume that the picture-taking season is over. And in so doing they miss a lot of fun and good pictures.

Matter of fact, with the new films and generally improved equipment, the snapshot season is continuous, winter as well as summer, indoors and out. We shall have much to say about indoor pictures. For a starter, let's talk about silhouettes—those pictures in which the figures are solid black on a white background, much like the scissor pictures you see.

With silhouettes, even more than with ordinary snaps, it is vital that the pictures tell their own story. (Unless, of course, you want simply a portable portrait.) For you have only outlines to work with, unsupported by perspective or detail.

The first essential of silhouette pictures is a perfectly black background, devoid of detail. And the easiest way to obtain such a background is to stretch a bed sheet across a broad doorway between two rooms. It's important that the sheet be tacked up so that all creases and wrinkles are eliminated.

To light up this background, a strong light must be put in back of it, about six feet away either centered or placed directly back of the major feature of the picture. You have a wide choice of lamps. You can use a couple of ordinary 50-watt

Important Military Air Bases Are Being Considered For Protection Of Far-Flung Empire Outposts

And, after all, she is very important in this triangle.

Firstly, I will deal with the man. His writing shows that he is a very competent, keen minded person, with a great deal of enthusiasm, and a rather dominant will of the kind that does not like resistance to his own opinions.

He is very strongly emotional, and is not what will call a "physical" type of man. There is lots of colour in his nature, and he is very fond of the good things of life. But there is very little generosity shown.

Your own writing shows a very ardent and warm-hearted nature. You do things on the impulse of the moment, and are very responsive to emotional appeals. You crave affection, and would not be happy for long without it.

You are generous and sympathetic, and glad to do things for others. My advice to you is to give up your gentlemanly friend. It is not necessary for me to go at all into the angle of the wife, to give this opinion.

Your nature is not compatible with that of the man. You have been overcome by a feeling of sympathy for him, which has gradually grown into a form of love for him. But it is not a lasting love.

Give him up, and you will not long lament the passing of this, your first "serious affair." His feeling for you is undoubtedly temporary—the infatuation of a man much older than yourself for a young, and probably pretty girl.

Do not spoil your life because of a temporary emotional urge.

Do you want your character analysed? The author will tell you what you are really like. And he can tell you the truth about your friends. Send specimens of the writing you want analysed, and enclose 10c coin for each specimen. Send 10c stamped addressed envelope, to: Lawrence Hibbert, c/o Winnipeg Newspaper Union, 115 McEwen Ave., Winnipeg, Man. Letters are strictly confidential and will be answered as soon as possible, but please allow about two weeks for your reply.

Construction of an important military air base in the Malay archipelago is being considered by the British air ministry, it was learned, in conjunction with its vast plan to expand existing air communications and protect the far-flung outposts of the empire.

There are at present three so-called aerial "empire routes"—one of them with regular air connections, the other with periodic aeroplane service and the third being contemplated. They are London-to-Melbourne, London-Cape Town-and-London-Ottawa.

Regular air service on the Australian line at present goes only as far as Singapore, Straits Settlements. This, however, is soon to be expanded so as to link the British capital with Melbourne.

"Protection" of the Malay archipelago by means of an air base, it was pointed out, is therefore a natural outcome of such aerial connection, and at the same time a strategic measure of vital importance.

The weekly air service is in operation between England and Cape Town, Union of South Africa. It is believed that direct 10-day air journey to the union will in the near future be accelerated to eight or nine days with twice-weekly connections.

The Ottawa plan is still incomplete. Contrary to assertions made recently by certain newspapers, that such an airline would crystallize shortly, Lord Londonderry, minister of air, announced in the House of Commons that the ministry envisaged no such move at present.

Homing Instinct Of Pigeons

Theory Is That Magnetic Influence Draws Racer Back

Thousands of British racing pigeons are liberated every week-end at distances ranging from 100 to 700 miles from their lofts, yet except in the case of severe Channel storms or attacks by peregrine falcons, few fail to find their way home. Training, however thorough, does not entirely account for the homing instinct. One theory is that when a bird is taken from the loft, a kind of invisible elastic or magnetic influence is set up, which draws the racer irresistibly back from wherever it is released. Pigeons of the second generation, bred in the same loft, appear to have this power more highly developed than others. The most expert fanciers are at a loss to explain a recent well-authenticated case, where a brood of pigeons, hatched out in an English loft, flew straight back to that loft, having never previously set eyes on Britain.

Styles In Sheep Changing

Heavily Fleeced Animals Are No Longer In Demand

Even styles in sheep are changing. The place of the heavily fleeced, wrinkled sheep is rapidly being taken by a new model of more generous proportions, says a bulletin from the University of Wisconsin. This is due, explains James J. Lacey of the university's College of Agriculture, to the fact that with modern heated homes and comfortable equipment for travel there is less demand for heavy clothing. The heavily fleeced animals, therefore, are being replaced by animals of the meaty type.

Our Hourly Test

Character Made Or Marred By Everyday Actions

Every hour of every day our discipline is put to the test. The care we take and the uses we make of our bodies; the government of our appetites and passions, the thoughts and feelings we cherish; the influences and temptations we exhibit to each other, the principles and motives which control us in industry, trade and politics—surely these have far more to do with making and maring our character than our theological speculations and our church organizations. —Aunt Sarah

If new linens are rubbed with fresh lard and then thoroughly heated in the oven before it is used, it will not rust afterward.

JOHN VAN GUILDER

... Helps to AVOID MANY COLDS altogether

Quick!—At that first nasal irritation, sniffle or sneeze—just a few drops of Vicks Vapo-Rol. It stimulates the functions provided by Nature—in the nose—to prevent colds, and to throw off colds in their early stages. Used in time, Vapo-Rol helps to avoid many colds entirely. Where irritation has led to a clogged-up nose (a stuffy head cold or nasal catarrh) Vapo-Rol penetrates deep into the nasal passages, reduces swollen membranes, clears away clogging mucus—brings comforting relief.

Better CONTROL of Colds
This new aid in preventing colds, together with Vicks VapoKub, the modern external treatment for colds, forms the basis of Vicks Plan for Better Control of Colds—to help reduce their number and duration. The Plan is explained in each Vicks package.

VICKS PLAN FOR BETTER CONTROL OF COLDS

Gun Shoots Light Rays

Two inventors in France claim to have perfected a gun which will shoot "light rays" capable of paralyzing an aviator and bringing down his aeroplane. They say the rays can be generated to any intensity.

Why at 40. You Think You're "GROWING OLD"

It's Frequently Just an "Idea." Not "Old Age." And according to Scientists, May be Something No More Alarming Than A Touch Of Acid Stomach

At about 40, many people think they're "growing old." They're tired a lot. Have headaches. Stomach upsets. Dizziness. Nausea.

Well, scientists say the cause, in a great many cases, is merely an acid condition of the stomach. The thing to do is simply to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, all you do is take Phillips' Milk of Magnesia after meals and before going to bed.

Try this. You'll feel like another person! Take either the familiar liquid "PHILLIPS'", or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of liquid Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

TEETHING FEVER

Relieved!

Mrs. Edward James' baby had two teeth when less than three months old. She writes: "He has 18 now and I can truthfully say that giving him Baby's Own Tablets while cutting his teeth kept him fit and well." Teething is a restless feverish time for babies but the little ones who take Baby's Own Tablets and the fever reduced by giving sweet, safe Baby's Own Tablets. Very easy to take, no after effects. Price 25c everywhere.

Baby's Own Tablets

Little Journeys In Science

(By Gordon H. Guest, M.A.)

Light is produced by numerous living creatures, such as the firefly, the glow-worm, and certain varieties of squid and fish. This light is accompanied by very little heat and hence is called cold light. The search for heatless illumination is a fascinating one because cold light is more efficient than electric light. If the scientist can discover completely the secret of the firefly, he will be able to produce light much cheaper than warm light. At the present time the consumer of electricity for the production of light pays not only for the light, but also for the heat which is always given off along with the light.

The bodies of animals have a marvelous mechanism for the changing of foods into heat, and in certain cases into light and electricity. A steady combustion takes place within the body of an animal during its entire lifetime and it possesses efficient heat-regulation so that it is quite independent of cold. The firefly can flash its light, and electric fish can generate sufficient electricity to ring a door-bell.

Three are a great many light-producing organisms. Scientists have found that there are at least 40

Swollen Joints

often are a warning that your kidneys have become damaged and need attention. Don't suffer needless pain. Take Gin Pills to obtain relief and assist your kidneys to function properly.

SUNDAY SCHOOL LESSON NOVEMBER 18

THE CHRISTIAN AS CHURCH MEMBER

Golden text: "We are members of his body." Ephesians 5:30.
Lessons: Matthew 5:13-16; Acts 2:41-47.
Devotional reading: Ephesians 3:14-21.

Explanations And Comments
Responsibilities of Christians, Mt. 5:13-16. In our First Quarter we had three lessons from the Sermon on the Mount, the first one being the twelve verses which precede in Matthew's Gospel our text for to-day. They began, you will recall, with the statement that as the multitudes, Jesus went up into the mountain; and when he had sat down, his disciples came unto him; and he opened his mouth and taught them, saying, The Beatitudes followed. Verses 13-16, our text to-day, give Jesus' succeeding words which emphasize the influence and responsibility of disciples.

"Ye are the salt of the earth," Jesus declared. Salt was used in sacrifice by Jews, Greeks, and Romans, and was an emblem of purity and of the influence of a holy life upon others. Salt preserves from corruption. Jesus was reminding his disciples by his statement that it was their duty to keep others from moral corruption. There was an old Roman proverb to the effect that "nothing does more good than sunshine and salt."

"There has scarcely been a town in any Christian country since the time of Christ where a century has passed without exhibiting a character of such elevation that his mere presence has shamed the bad and made the good better, and has been felt at times like the presence of God himself."

"But," continued Jesus, "if the salt have lost its savor, wherewith shall it be salted?" They must beware lest they lose their Christian character and become as useless in his Kingdom as salt that has become good for nothing and is cast out upon the ground and trodden under foot of men. This was no mere figure of speech.

Another figure Jesus gave to stress the service that his disciples should render. "Ye are the light of the world." They were conspicuous witnesses for him, comparable to a city which could not be hid, for it was built upon a hill. It has often been suggested that from the Mount of Beatitudes, where the Sermon on the Mount has been localized, Jesus may have pointed as he spoke to Safed, a conspicuous hill-city.

"Ye are the light of the world from whom you receive your light. And as Phillips Brooks reminds us, the soul must stand in the sunlight to bear witness to the sun."

Hard On The Widows

Stern regulations covering divorce and marriage have been issued by the Serb-Greek-Oriental Church through its synods. The most stringent of the regulations forbids widows to remarry until 10 years after the husband's death. A widow, on the other hand, must wait only 40 days before remarrying.

Australia has exported more than 70,000,000 bushels of wheat this year.

orders of animals which contain one or more light-producing forms, and that there are two groups of plants, namely fungi and bacteria, which are luminescent. Fireflies, glow-worms, jellyfish, brittle-stars, mollusks, and squid are all light-producing organisms. It has been observed that even the eggs of some animals are luminescent. Light-producing animals are never found in fresh water, but they all live in the sea or on land. Most of the luminescent sea animals are found many feet below the surface.

The glow of damp wood (known as fox-fire) is due to fungi, a low order of plants to which mold and mildew belong. The phosphorescence of dead meat or fish is caused by bacteria. It has been only in recent times, since scientists have perfected the microscope, that the phosphorescence of the sea, the shining of damp wood, and that of dead fish and meat have been shown to be due to different forms of living organisms.

Cultivation Of Seaweed

How to scientifically cultivate seaweed may be studied by Philippine Government authorities. Seaweeds, or edible algae, abound in the coastal regions of the archipelago and are used in preparing salads, soup and pickles. The Fish and Game Administration has been directed to collect data regarding the extent of the present seaweed industry.

Retail trade in Australia continues to increase.

Golf Came First

A Scotsman was a devotee of golf. His wife remonstrated with him, but found it unavailing. Finally, she delivered an ultimatum. "Sandy, if you do not play less golf I'll leave you," she said. There was no audible reply, but she presently overheard her husband soliloquizing. "Goah, I am going to miss her."

There are more Jews in the United States than in any other country in the world.

QUIVERING NERVES

When you are just on edge... when you can't stand the children's noise... when everything you do is a burden... when you are irritable and blue... try Lydia E. Pinkham's Vegetable Compound. 98 out of 100 women report benefit. It will give you just the extra energy you need. Life will seem worth living again.

Don't endure another day without the help this medicine can give. Get a bottle from your druggist today.

Lydia E. Pinkham's VEGETABLE COMPOUND

Line your roasting pan with Canapar Cookery Parchment. The fats and juices won't burn. The meat is more succulent—and you save yourself all the bother of scraping or scouring the pan afterwards.

You can cook three vegetables at once in the same pot—when you place each in a bag of Canapar. No odors escape. All the goodness is sealed in. Use only ONE burner and turn that down low. Save fuel! Boiled or steamed fish is better, and less work, cooked in Canapar.

Just rinse the sheet of Canapar and use it over and over again. It won't absorb odors. Many women use it for a dish cloth. It's just like silk when wet—is very tough and does not shed lint.

BRITAIN PLANS TO PROVIDE MORE WORK FOR IDLE

London.—The "permanent" and unavoidable surplus of unemployed in Scotland should not be more than 60,000, and in South Wales 39,000, declare the reports of special commissioners who have conducted an investigation for the government of the more seriously depressed areas.

The reports cover Scotland, Durham and the Tyneside, Cumberland, South Wales and Monmouthshire. They recommend improvement of existing industries of those areas; introduction of new industries; transfer of surplus unemployed to other parts; training of juveniles and schemes of land settlement and afforestation.

The strategic advantages from the defence viewpoint of the West Cumberland and Cardigan areas are cited in connection with proposals for the establishment of government factories there.

Relief schemes generally are discounted as merely palliative, but the reports suggest the government be prepared to hand out subsidies covering the first two years' wages of unemployed absorbed by any private firm that is prepared to create factories.

Preparation of a government scheme for aiding the worst-distressed areas will be spurred by the reports and it is expected that legislation may be introduced early in the new session, opening at the end of the month.

Waiting Request From League

France Is Prepared To Send Troops To Saar

Paris.—Foreign Minister Pierre Laval told Roland Koester, German ambassador to France, that France stands ready to send troops into the Saar Basin if the League of Nations so requests.

He denied, however, that special military movements already have been ordered.

The ambassador replied Germany had no intention whatever of disregarding conditions fixed by treaty in order to assure free voting in the Saar.

Szilburg, Austria.—A member of the Austrian Nazi legion appearing before a court here on high treason charges told his judges the legion had been prepared in Germany for "action in the Saar."

Interesting Ceremony

Duke of Kent Is Presented To The House of Lords

London.—Centuries rolled back as the Duke of Kent, youngest son of the king, was presented in the house of lords.

Members of the workaday house of common left their precincts to crowd their gallery in the house of peers. The deputy earl marshal and other dignitaries led the procession immediately followed by the Duke of York, the Duke of Kent and lastly the Prince of Wales. The clerk read the letters patent creating Prince George the Earl of St. Andrew's and Duke of Kent.

Interested In Butter Plans

Many Inquiries At Ottawa In Connection With Marketing Control

Ottawa.—The butter schemes proposed by the National Dairy Council and now under consideration of the Dominion marketing board is the subject of innumerable inquiries from all sections of Canada, it is learned.

The scheme, it is believed, has not been before the board, as yet, in a serious way. The absence from Ottawa of important members of the board has made it impossible to deal with the butter question and important developments are not expected for a few days.

For Western Bank

Edmonton.—Formation of a central bank for the four western provinces was advocated in a resolution passed by an economic conference of Edmonton Liberals here.

W. N. U. 2072

Farmers Battle Police

Fourteen Picketers Are In Jail As Result Of Skirmish

Mundare, Alta.—Fourteen men were in jail, one man suffering from a deep gash over an eye, and several others burning bruises caused by police clubs in the hands of R.C.M.P. officers in a battle to round up grain strike picketers here. The men are held without bail.

The battle started when John Lomash, anti-striker, stopped here with a wagon lot of wheat and got the aid of R.C.M.P. Constable Pearson. Constable Pearson drove with him toward an elevator and 20 picketers advanced, upset the wagon and caused Pearson to land on his head.

Reinforcements from the Vegreville detachment of the R.C.M.P. under Inspector Scott raided the picketers, and with clubs and drawn pistols waded in when the men refused to submit.

Steve Hawko received a gash over his left eye in the battle and several picketers were clubbed over the back. Finally, 14 were herded together and marched to the town cell. Only one R.C.M.P. man was hit by a picketer, it was announced.

Nine of the picketers were taken to the Fort Saskatchewan provincial jail, and a camera held by one of the picketers which recorded phases of the battle was confiscated.

The grain strike is based on protests of certain groups of farmers who are protesting against what they call low grading and certain dockages. Mundare is a settlement of Central Europeans and is about 50 miles east of Edmonton.

Convicts Escape From French Penal Colonies

Suffered Many Hardships In Hazardous Trip To Safety

Aruba, Dutch West Indies.—Ten escaped convicts from three French penal colonies off French Guiana reached Aruba to tell an incredible tale of hardships suffered during their escape.

The men, headed by Jean Duverney, made the perilous ocean crossing despite the fact there was not one sailor in the lot.

For three of their 32 days under the searing Caribbean sun they were without food and for five days no water passed their parched lips. Twice their frail boats were wrecked and many times they were near death.

Favor Independence

Dublin.—A majority of the Irish people are prepared to vote for complete independence of their country, Eamon De Valera, president of the Irish Free State, declared in an election address at Limerick.

Conference Must Continue

London.—Great Britain and the United States agreed again that tri-power naval conversations must continue until an agreement is reached, but insisted any concessions must come from Japan.

TO DIRECT MOVIE

Winston Churchill, one of Britain's most famous political leaders, who turns from politics to the screen to make a film record of the last 25 years of British history. The record will be completed in time for the celebration of the Jubilee of the Coronation of the King next spring.

Coast Mayorality Fight

Interest Aroused In Elections At Vancouver To Be Held In December

Vancouver.—Two of British Columbia's most colorful political personalities, an ageing veteran of civic administration and a more youthful campaigner whose plans for national monetary reform created Dominion-wide interest last spring, will seek the Vancouver mayorality in the elections of December 12.

G. G. McGeer, K.C., Liberal member of the British Columbia legislature for Vancouver-Burrard, added another item to an ambitious political program when he announced he would oppose Mayor L. D. Taylor's quest for re-election. Mr. McGeer had previously stated he would seek the Liberal nomination in the federal constituency of Vancouver-Burrard for the next elections.

Before "Gerry" McGeer's announcement, Mayor Taylor was the only candidate definitely in the race for the next two-year term of office at the head of the city council.

Planning Australian Flight

London.—Capt. Charles Ulm, Australian airman planning a flight from Vancouver to Australia, figured his specially-engined plane will have a cruising radius of between 3,300 and 3,500 miles. This is roughly 1,000 miles more than the greatest cruising radius of the entrants in the London-Melbourne race.

Alberta Appointment

Edmonton.—George W. Gorman, chief inspector of schools in Alberta for the past 15 years, was appointed deputy minister of education, it was announced by Hon. Berren Baker, minister of education.

May Be Important Find

Tar Sand Has Been Struck Near Hudson Bay Junction

Regina.—Samples of tar sand discovered in boring operations in Hudson Bay Junction vicinity have been received by company officials here.

Companies in joint drilling operations there are the Trail Bitumens Company and the Senator Oil and Gas Company, of Ottawa. The tar sand was struck at 500 feet and the drill continued another 20 feet still in the tar sand.

Operations were forced to stop owing to the tar sands backing up in the drill tubing. As a result work has ceased until further casings can be obtained. The drill before it hit the tar sands went through from the surface, 40 feet of limestone under the top soil, 40 feet of gypsum streaked with lime, a small sand strata and then the tar sands.

The geology of the under-surface is reported to be favorable for the discovery of oil, according to Mr. Great. Samples have been brought to Regina and they show a high quality product, but so far any analysis is unofficial. Just as soon as further casings arrive drilling operations will continue.

Co-operation Is Promised

Federal Government Willing To Help Tourist Industry

Ottawa.—Prime Minister R. B. Bennett gave the tourist industry of Canada a pledge it would be afforded the full co-operation of the federal government but at the same time he added a note of warning it was up to the industry to protect the good name of Canada by seeing the tourist received the fairest possible treatment, from the standpoint of courtesy, truthful representation and honest price charges.

The prime minister addressed the members of the Canadian Association of Tourist and Publicity Bureaux and other tourist publicity experts representing the transportation companies, municipalities and private organizations and members of the senate tourist committee, at a dinner which concluded the nation-wide tourist conference called by the Canadian Travel Bureau.

Death Rate Lower

Has Decreased In Canada During The Period Of Economic Stress

Toronto.—Canada's death-rate has decreased during the past four years of economic stress until now it is the lowest in the history of the country, according to Dr. Grant Fleming, director of the department of public health and preventive medicine at McGill University, Montreal.

Dr. Fleming spoke on "Health and the Depression" at the 10th annual meeting of the Canadian Dental Hygiene Council here.

Officers of the C.D.H.C. for the coming year were named, with the president E. E. Reid, London, Ont. The executive committee includes Dr. L. J. D. Fackel, Regina.

MOST EMPHATIC ENDORSATION OF NEW DEAL IN U.S.

New York.—Power of the old-line conservative Republicans was broken in the congressional elections and the Democratic party, or the New Dealers, found themselves masters of the senate and house of representatives, rapidly moving toward complete and solid control of governorships and legislatures in 23 states.

In the fifth winter of a depression the voters of the United States declared with no uncertain voice for the policies of federal relief and government control of business and agriculture instituted during the past two years by President Roosevelt.

The Roosevelt New Deal tide spared neither age nor reputation in its devastating sweep.

The country has given Roosevelt the signal to go ahead with his rammed new deal by sweeping Democrats into federal and state offices in unprecedented numbers. Far from losing ground, as is usual in off-year balloting, the jubilant Democrats invaded such Republican fortresses as Pennsylvania and seemed assured of commanding two-third majorities in both branches of the next congress.

With the overwhelming stamp of approval placed on his experiments, President Roosevelt may be expected to push ahead with two plans close to his heart—the St. Lawrence seaway and increased international trade.

Recently Roosevelt has sworn the it remains to be seen, if the great body of Democrats will not prove so unwieldy as to force his hand. Many of them verge close to the outermost border of the left; others swing as decidedly to the right. Only time can tell which carry the weight.

Want Grain Grading Probe

Investigation By Board Of Grain Commissioners Asked By Alberta Liberals

Edmonton.—An investigation by the board of grain commissioners into grain grading, holding of an immediate Alberta general election, and powers for the debt adjustment board of this province to reduce principal and interest were some of the demands made in resolutions passed by the central Alberta Liberal economic conference sessions here.

"Certain manipulation" at the end of terminals was charged by delegates who urged the grain grading inquiry. They also commented upon what they described as a five-cent spread between track and street prices. It was also claimed that grain similar to what had been graded No. 2 last year had been graded No. 4 this year in one instance.

Italy's Wheat Imports

Slightly Higher In October This Year Than Last

Rome.—Italy imported 32,270 quintals of wheat during October, compared with 31,092 in October last year. (A quintal of wheat is 3.67 bushels.)

A general statement covering the four months period from July to October shows that imports decreased this year by 20,586 quintals, whereas those of maize increased 46,035 quintals.

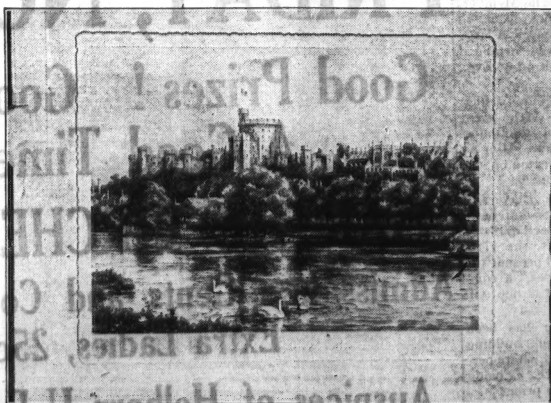

Predicts More Members

Edmonton.—Increase in United Farmers of Alberta membership of from 1,000 to 3,000 was predicted by Vice-President Norman F. Priestley here. Mr. Priestley said that improved conditions in farm communities of Alberta together with revival of interest in U.F.A. objectives would share in the increase.

Moving To Toronto

Toronto.—C. C. Stewart, traffic and operating assistant to the general superintendent of the Canadian National Telegraphs at Winnipeg, will take over the same position on the eastern line, it has been announced. His headquarters will be in Toronto. W. M. Hamilton, western lines inspector, will take Mr. Stewart's place at Winnipeg.

THE KING'S CHRISTMAS CARD

This year, His Majesty the King will have a painting of Windsor Castle on his Christmas Card, and the view will be taken from the river. "Direct thy steps to Windsor's stately courts—explore her halls, her towers, her sacred fane. And treat thine eye with grandeur. Look around and mark the teeming landscape strewn with gems of architecture; mansions, villas, domes, replete with art and science, taste and beauty."

THE WHEAT SURPLUS

The world's "carry-over" of wheat since 1928 has been about 1,100 million bushels each year instead of a normal of 625 million. Authorities estimate that by August 1st next the "carry-over" will be reduced to a figure between 725 and 825 million, or still show over 100 million bushels more than normal. A great shortage of coarse grains, however, is apparent throughout the world. Some expect that a substantial part of the world's wheat "carry-over" will be used to replace coarse grains. If this should occur, no doubt, wheat prices will tend to rise—otherwise they may not do so due to low purchasing power of European bread-eating people.

Health Insurance Tryout.

The public of Alberta is evidently quite prepared for a complete tryout on a small scale of the health insurance proposals recommended in the report of the Commission on State Medicine presented to the Alberta Legislature at last session, and most classes concerned are ready to give full co-operation in such experiment, to judge by the feeling evident at the general conference on the subject recently held at the University of Alberta.

Indication of this attitude was given by representatives of various organizations most vitally concerned in the proposals.

It was made abundantly clear during the conference both by Hon G. Headley, Minister of Health, and Dr. McGugan, Sec. to the commission, that it was not the intention of the Alberta Government to carry out the proposals of the commission for certain health insurance plans, on any wide scale, until such time as experimentation on a small scale had established the soundness of the proposals.

The plan is that while legislation will probably be introduced at the coming session to give the proposals legal status, yet it is the intention to carry out an experimental first in only two so-called health units, Urban and the other rural.

Hon Mr. Headley declared the problem to be solved was the greater distribution of health services among the people.

The Province was amply equipped now with all that was necessary in the way of facilities and professional ability to give full service to the people.

The situation was that an increasing number of people found it impossible to finance health services they needed, while doctors were reaching the point where it would be impossible much longer to go on giving services without adequate return.

The Minister paid a tribute to the medical men, nurses and dentists who were in these difficult times giving a tremendous amount of service without any hope of financial reward.

Our problem is to solve the difficulty of the pooling of costs and the paying capacity of the people after which we must concentrate on the distribution of health services.

Under a health insurance plan it would be possible, Mr. Headley said, to regulate the quality of service given to the people. Humanity was not a plaything in the operating room, nor should we gain experience by unnecessary human suffering.

Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14.
Ducks, geese, Sept. 15 to Nov. 14.
Elk, Oct. 1—Dec. 14.
Grouse, Oct. 1—31.
Hungarian Partridge, Sept. 15—Nov. 30.

Fox, Nov. 1—Jan. 31.
Mink, martin, otter, Nov. 1—March 31.
Muskrat, March 1—April 30.

Peck's CAPS

—are made for these men and young men who appreciate the little touch of refinement in head dress.

The most comfortable and most serviceable caps made for golf, motor and all outdoor occasions, as well as street wear.

GRADE SIX WHEAT IS BETTER THAN NO. FIVE

It's odd, but true, says an Edmonton grain expert. A farmer whose damaged wheat sinks to grade No. 6 gets more for it at lakehead than for a car of No. 5.

There is a quirk in the market this fall whereby feed grade of wheat at Fort William is selling 11c per bushel above the same grade at Vancouver, and No. 6 wheat at lakehead is worth half a cent more than No. 5 at the same port.

E. B. Ramsey, chairman of the Grain Commission, when in Edmonton on Saturday, explained this as due to American imports, there being a strong demand for feed from the Central States, but none from Pacific States.

The U.S. is admitting grades No. 6 and feed under a 10c duty applicable to feeding wheat, but No. 5 and other higher grades, held subject to 40c duty on every bushel, are not bought for feeding purposes by importers.

Taxes! Taxes!! Taxes!!!

A steady stream of Inga rate payers anxious to pay their tax awaited on Secretary Joseph Best at the Royal Hotel Parlor on Saturday last. A surprisingly large amount of current taxes was received, and a satisfactory sum from back taxes.

It is probable another visit here from Inga's Secretary will be arranged.

To Regain His License.

His friends are rallying to the support of Mr. E. H. Baron, the automobile dealer, who recently had his driver's license cancelled.

The friends have a petition in circulation, which is being largely signed, asking for a reconsideration of his case, and this will be forwarded to the proper authorities, when completed. The Sun is informed the cancellation is without precedent in this Province, and is sure to prove a hardship in the case of Mr. Baron.

"F. P. I"

The attraction for this Thursday Evg, the 15th is another of the high order which Mr. Goodman has been favoring us with. The caption of this is "F. P. I" and is one continuous thriller with a number of unusually fine scenes and escapes. Leslie Fenton, well known to movie fans, will be seen in this picture; also Conrad Veidt and Jill Easnow.

Mr. Goodwin's patrons were delighted at the double feature presented on Thursday last. The first film showed Laurel and Hardie, with their side splitting comicalities. "Oliver Twist" brought delight to the large number of teen age patrons present, and was a source of keen enjoyment to the balance of the auditors, as well.

For Sale, 8-inch Vessot Crusher; 1 Cow and 5-month-old calf. Hubert Schmeier, Stony Plain.

LOST, on the road south of Carvel, Friday, Nov. 2, One Brown Umbrella Tent. Reward on return to F. D. Goebel, Spruce Grove, or leave at Sun Office.

Ideal Beauty Parlor,
First St., Stony Plain, NOW OPEN.
Florence Goebel,
Fully-Fledged Operator.

Reducing the Wheat Surplus.

The outlook for Canada's working off her large wheat carryover and reducing it to normal proportions during the present crop year are fairly bright, stated John I. McFarland on Monday at Regina, to the Saskatchewan Wheat Pool delegates.

Contrasted with the world picture a year ago, he found some ground for optimism at the present time.

On the basis of estimates of world requirements he saw no reason why Canada should not play a major role in international wheat trade in the months ahead and ship heavily without demoralizing the price structure in the process.

Mr. McFarland drew attention to the fact that the U.S. hard hit by two disastrous crops in succession, was not only out of the export field but was already proving a market for Canada's low-grade wheats for feed, also durum and malting barley. Further, the U.S. might be expected to take quite substantial quantities of high grade Canadian wheat for milling purposes.

As a result, it seemed not at all unlikely that "Canada will have her surplus down to normal before next August, and if the U.S. takes as much as many Americans believe they will, then this country will have bare bins before the next crop."
